

Figure 1: A line graph showing the relationship between the number of people and the number of people who are not people. The x-axis is labeled 'Number of people' and the y-axis is labeled 'Number of people who are not people'. The graph shows a straight line with a positive slope, starting at the origin (0,0) and extending upwards and to the right.

Figure 2: A line graph showing the relationship between the number of people and the number of people who are not people. The x-axis is labeled 'Number of people' and the y-axis is labeled 'Number of people who are not people'. The graph shows a straight line with a positive slope, starting at the origin (0,0) and extending upwards and to the right.

Figure 3: A line graph showing the relationship between the number of people and the number of people who are not people. The x-axis is labeled 'Number of people' and the y-axis is labeled 'Number of people who are not people'. The graph shows a straight line with a positive slope, starting at the origin (0,0) and extending upwards and to the right.
